**PolyCello print quality recognized at international level**

Amherst, N.S. – High definition printing technology has propelled PolyCello to its fifteenth print quality award in nine years. PolyCello was awarded a bronze award in the mid web, line category by the Flexographic Technical Association. The eight-colour item was selected by judges for great registration and a challenging configuration.

“Our customers’ success is our mission,” said Stephen Emmerson, president and CEO of PolyCello. “Awards like this one from the FTA demonstrate a third party endorsement of our quality which is a direct form of success for our customers.”

The Excellence in Flexography award was presented March 6<sup>th</sup> at the 2016 FTA Annual Forum, the premier industry gathering for flexographic printers, in Fort Worth, Texas.

“Our pre-press and printing teams work hard to ensure our customers have high caliber packaging. Our employees are the reason we can produce award winning quality year after year.” said Jeff Hatfield, printing manager at PolyCello.

PolyCello is part of the P.G. Emmerson Group of companies, which operates two manufacturing facilities in Canada, as well as a network of distribution centers throughout North America. The P.G. Emmerson Group of companies employ nearly 500 team members.
